This pass covered the entire search area, however the quadrant of the area was cloud-covered.

The search area was completely covered by good quality photography. There were a few scattered clouds in the northern half of the area.

The search area was completely covered by good quality cloud-free photography.

Only the northeast extremity of the search area was covered. The photography was too dark to be useable.

This pass covered the eastern one-third of the search area, was snow covered, and of fair quality.

This pass covered approximately the western third of the search area, was snow-covered, and of fair quality.
